

Find your tree twin
Can you spot your special tree?

Tree twins

There's a special tree in every wood that's just waiting to meet you.

All you have to do is find it!

1 Choose a thin stick and dip it in some wet mud.

2 Trace the mud across the two, three or four main lines on your palm.

3 Search for a tree that has the same pattern. Look for it in branches, tiny twigs or in the bark.

When you find your special tree, give it a hug and say hello.

Feel free to copy and share this for personal and educational use – and don't forget there are loads more brilliant activities to download on our website!
